## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 02/13/04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

The Applicant is required to submit the foreign patent document GB 2373408 for consideration.

### ***Drawings***

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the each of said first and further loudspeaker enclosures comprises a front cover with an opening must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

Art Unit: 2615

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification, as originally filed, does not provide the support for the invention as is now claimed. The original specification does not disclose a first loudspeaker coupled with a first enclosure configured to have a first frequency response and at least one further loudspeaker coupled with a second enclosure configured to have a second frequency response as now claimed in claim 1. The specification discloses that a loudspeaker system is set forth incorporating at least two asymmetric enclosures (i.e. different sizes) having different but overlapping frequency

Art Unit: 2615

responses (page 2) or two loudspeaker enclosures with different volumes and characteristics are used (page 4).

The specification does not disclose that each of the first and further loudspeaker enclosures comprises a front cover with an opening, an acoustically transparent grill and a gasket as claimed in claim 3. As shown in figure 3, only one speaker enclosure comprises a front cover (1) with an opening to accommodate a separate acoustically transparent decorative grill (2, page 4, lines 2 and 3).

Further, the specification does not disclose a digital signal processor for separating high frequency portions of the first and further frequency responses as claimed in claim 6.

### ***Conclusion***
